

Dust Containment Systems

MID SIZE VACUUM

BDC-1330TLP

The Blastrac® BDC-1330TLP has been designed for the tough conditions of concrete dust collection and built for multi-purpose use, for multipurpose use with medium shot blasters, scarifiers, grinders and polishing machines. Its superior filter system reduces airborne dust and particulate to provide a cleaner work environment.

This tough, industrial grade vacuum has a pressure-molded, resin-reinforced plastic body that will not rust or dent. The compact, vertical profile maneuvers easily with large wheels and 2 swivel/locking casters. Its large, pleated filter media is easily accessible and features a spring-loaded manual shaker for extended use, without exposing the operator to harmful dust or contaminants.

Operating on 110 volts, the three-motor system produces a maximum air flow of 264 CFM, a maximum static pressure of 80 in H²O, and has a noise rating of only 80 dB. The motor and filter assembly of the vacuum are well protected for long life. For more stringent requirements, a HEPA filter is an available option.

The manageable BDC-1330TLP is an economical solution for providing virtually dust-free operation to small and medium surface-prep machines.

Available in either 110V or 230V models.

Longopac® bagging system

SPECIFICATIONS:

- Airflow:** 264 CFM maximum
- Bag Capacity:** 55lbs (25kg)
- Motor Power:** 110V, 1Ø, 60 Hz
- Amperage:** 16A
- Power Cord:** 28 ft. (8.5m)
- Dust Extraction Motors:** 3 independent motors
- Filter:** M-class star filter
- Dust Hose Inlet:** 2in. (51mm)
- Dimensions:** W 28in. x L 39in. x H 54in.
(W 735mm x L 985mm x H 1360mm)
- Weight:** 165 lbs (75kg)

FEATURES AND BENEFITS:

- Innovative dust collector with strong metal body work
- Tilt system which makes it possible to transport the dust collector in small vehicles
- Environmental and user friendly bagging system
- Heavy duty equipment, designed for continuous use
- Spring-assist shaker mechanism for manual filter cleaning
